Re: Sample of Signed Federal Register Actions from Regional Offices on State Implementation Plans

This information responds to your message requesting a few pending SIPs for the Administrator to review. The attached EPA actions on state implementation plan submittals were selected from a list of actions pending at EPA's Office of Policy for publication in the *Federal Register*. The actions were selected as a representative sample of the types of actions submitted by Regional Offices to OP for publication. Of the documents that are taking approval action (either a proposal or final action), we understand that OP may have cleared some of those today (June 22) and they may now be on their way to the Office of Federal Register for publication. Others of the documents were selected because they represent a more complex type of action that involves more than a simple approval. If you need any further information, please call me on 202-564-2095.
